

## PRESS RELEASE

Tyczka engages ELO with a cross-site information management:

### **ELO supplies Tyczka Totalgaz with ECM**

**Stuttgart, 31 March 2011 - Tyczka Totalgaz GmbH, one of the top addresses for a comprehensive energy supply, is putting its trust in ELO Digital Office. Earlier this year the decision was made to implement the Enterprise-Content-Management (ECM) software ELOenterprise. The software goes live in July 2011. The aim is the creation of a cross-site information management system. In the first step the handling of incoming invoices will be automated and therefore optimized. The next step is the reproduction of the entire contract management as well as the integration of Microsoft SharePoint Server, which is also being used. The decisive factor in the choice of the ELO ECM software was its high flexibility and usability.**

Dominik Spannheimer, head of organization and data processing at Tyczka Totalgaz GmbH explains: "Our motto is 'Energy is our passion'. This means high product quality and customer service are top priorities for us – and precisely these values are what we found with ELO. ELOenterprise promises precisely the flexibility which we expect from an ECM system."

ELOenterprise offers the liquid gas specialist the technical infrastructure to manage all the information throughout the company. This includes the archive server, which replicates the data of all connected locations both securely and reliably. This enables authorized employees to always have access to the latest information. The sales representatives can even retrieve the relevant company information via a variety of smartphones.

#### **Tyczka Totalgaz GmbH**

Tyczka Totalgaz is a joint venture of two major share holders: Tyczka Energie, in Geretsried, and TOTAL Germany, in Berlin. Tyczka Totalgaz is one of the leading specialists for liquid gas in Germany. Tyczka Totalgaz employs approx. 400 people throughout Germany. The headquarters is in Geretsried, south of Munich. Two service centers in Geretsried and Leipzig as well as a dozen storehouses and filling plants ensure a widespread supply for customers. The company is

# PRESS RELEASE

building upon its 85 years of experience and possesses a high level of logistical expertise due to its access to drilling holes, transfer terminals, refineries, tank wagons, and fuel depots.

## **ELO Digital Office GmbH**

ELO Digital Office GmbH develops and sells high-performance software solutions in the areas of electronic document management, digital archiving and workflow management and covers the entire spectrum of Enterprise Content Management (ECM). The ELO® product family meets all requirements of a high-end DMS/ECM system and it offers an ideal platform for efficient knowledge management and information management. ELOoffice is the entry-level solution for a small business. The modular client/server ELOprofessional is aimed at medium-sized companies. The high-end solution ELOenterprise is platform independent, high-scalable, multi-client capable and has its strengths in data centers and portals. The products are fully compatible with one another and data exchange and upgrades are possible at any time.

ELO separated itself from Louis Leitz and became an independent company in 1998, with its headquarters in Stuttgart (Germany). In the meanwhile, ELO has subsidiaries in Europe, Asia and Australia, also among other countries. Its products are used at more than 450,000 workstations worldwide via a close network of business partners. ELO also maintains numerous technological partnerships with software and hardware manufacturers like: Fujitsu, Hewlett-Packard, Kodak, Kyocera, Microsoft and also Sun Microsystems.

ELO products are found in use by various organizational branches and large companies, such as: Airbus, Alstom, EADS, EnBW, HSG Zander and also diverse government agencies, etc. More information can be found at: [www.elo.com](http://www.elo.com).
